SUMMARY

Economic Informatics student (ASE Bucharest) with hands-on experience automating data workflows in Python/SQL and building full-stack apps with React and Supabase. 1st place, VibeHack 2026 (Veridion Challenge). Looking for a software engineering internship where I can keep shipping things people actually use.

EXPERIENCE

Frontend Developer — Sindicatul Studenților din Cibernetică (SISC) Nov 2025 – Present

- Built and maintained UI components in React, JavaScript, HTML/CSS for internal SISC projects using reusable component patterns.
- Collaborated with a small team to plan features end-to-end and resolve implementation issues before release.

Data Automation Practicum — Procter & Gamble Academic Program Mar 2026 – Apr 2026

- Automated repetitive reporting by building Python/SQL scripts to clean, transform, and aggregate operational datasets, cutting manual processing time.
- Applied database querying and transformation techniques to improve data consistency and reliability across operational reports.

PROJECTS

VibeHack 2026 — Veridion Challenge, 1st Place

- Designed a company-ranking and qualification system matching complex user queries against a company database, using hybrid retrieval: structured filtering, embedding similarity search, and selective LLM reasoning.
- Cut unnecessary LLM calls through pre-filtering and ranking heuristics, improving speed and cost while scoring on NAICS classification, business model, and geographic fit.

Macro Tracker App Published on Google Play (Testing)

- Built a React + Supabase mobile app for calorie/macro tracking, with real-time tracking and personalized dashboards.
- Integrated external nutrition APIs for detailed food and macro data; live on Google Play in testing.

EDUCATION

B.Sc. Economic Informatics — Bucharest University of Economic Studies (ASE) 2024 – 2027

- Faculty of Cybernetics, Statistics, and Economic Informatics.

High School Diploma — Dante Alighieri High School

TECHNICAL SKILLS

Languages: C#, JavaScript, Python, SQL, Java, C++, Bash
Frameworks/Tools: React, Node.js, Supabase, Git, GitHub, REST APIs, Relational Databases
Certificates: Database Design and Programming with SQL (Oracle Academy), ECDL
Languages spoken: Romanian (Native), English (Advanced)
